Are you a driver

and taking care
of an elderly

Always keep your mask on, make sure it is constantly clean and change it when it gets wet.

Avoid contact with the elderly and maintain physical distance of no less than two meters, except when needed

Make sure the elderly is seated in the back seat and the front seat is left empty while maintaining good air flow within the car

If you feel you are having symptoms of infection, stay away from the elderly and go to the nearest branch of BeSure (Ta'kaad) clinics

The elderly are among those who are at higher risk of developing complications from Coronavirus
